Clive Richardson Limited were awarded the contract in 2017 for the construction of a full-sized 3G Training Pitch for Loughgall Football Club. The pitch was constructed on land which previously had a small shale training area within the clubs existing grounds at Ballygasey Road in Loughgall.

Works involved extensive earthworks to shape the site and establish a platform on which to construct the pitch. A 3G pitch on a dynamic base was then construed on top of the platform. CRL also installed a range of spectator, perimeter and ballstop fencing around the pitch. Various pitch equipment was also provided. As part of the works CRL also extended and re-stoned

the existing car-park area. works were undertaken in phases to accommodate other works which the club were doing at the time.

CRL also carried out floodlight infrastructure works, including the installation of floodlight bases and ducting. The floodlights were subsequently installed by another contractor under a separate contract.

The pitch was independently tested and achieved FIFA Quality standard following its completion.

Post Contract

Following the completion of the project Clive Richardson Limited have maintained a close working relationship with the Club. We undertook the sponsorship of the pitch on a long term contract. We also have a maintenance contract with the club and undertake all of the required maintenance of the pitch on a weekly basis.

More Information
